Risk and Compliance Management

This course covers the complimentary subjects of managing risk and compliance issues. It focuses on the skills and knowledge required to manage risk in accordance with ISO31000 principles and guidelines and to identify and interpret the range of external and internal compliance requirements and obligations that must be fulfilled by an organisation. It also covers how to evaluate and review an organisation's risk and compliance management system and how it is fulfilling its obligations and responsibilities under compliance requirements.

The course has been designed to be consistent with the ISO31000 Risk Management standard and the ISO19600 Standard for Compliance Management.

Learning Outcomes
At the end of this course, you will be able to:
- Identify organisational operations subject to compliance requirements and establish risk context
